

O₃ Pure
Air Systems

Fresh Air
Room
Deodorizer

User Friendly Operation

1. Check to ensure the control dial is in the off position, plug into an outlet.
2. Turn the Optimum output control dial clockwise. You will hear a click and a blue LED light will appear on the face of the unit. A blue glow should be visible inside of the ozone outlet and ozone production will begin.
3. Increase ozone production by turning the control dial clockwise. To reduce ozone production, turn the control dial counter clockwise.
4. To change locations simply turn control dial counter clockwise until you hear a click indicating the unit is off (LED light goes off). Unplug from the wall, re-install in new location and turn the Fresh Air Room Deodorizer on by turning the control dial clockwise.

Features

Design: Compact design ideal for residential use, RV use & small spaces

Chemical Free: does not use or produce chemicals

Optimum Output Control: adjustable ozone concentration
Silent Operation & Low Maintenance

Low power consumption

User Friendly & Refreshing

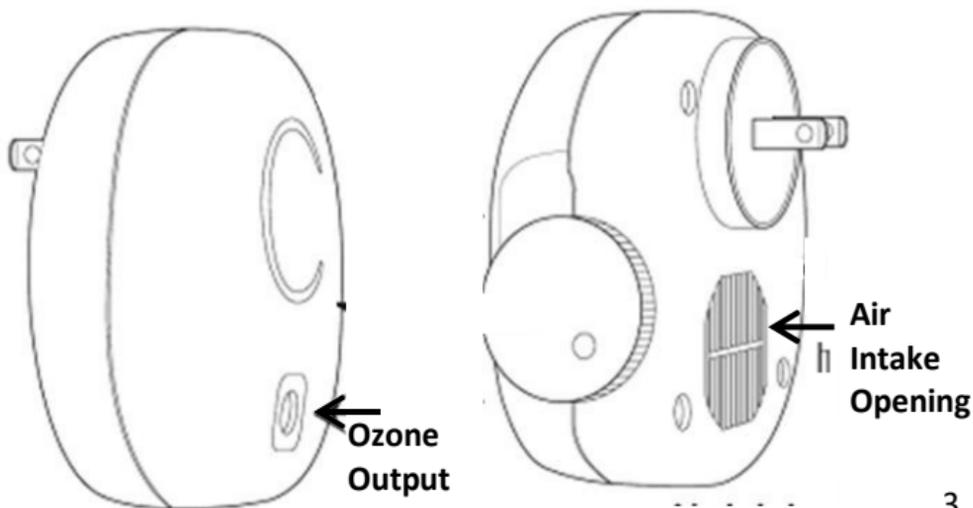

Compact & Portable: easily moved from room to room

Deodorizes: odors such as smelly shoes, smoke, sports equipment, the smell from pets, perfumes, etc., leaving rooms refreshed and odor free

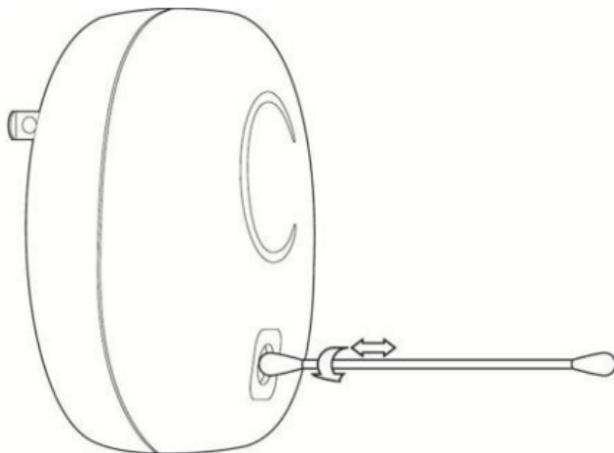

Ideal: for bedrooms, pet areas, bathrooms, kitchens, closets, cabinets, garbage areas, locker rooms, change rooms and many more

Care & Maintenance

1. Turn control dial counter clockwise until you hear a click indicating the unit is off and remove from wall.
2. Using an accessory brush, attached to a vacuum cleaner running on its lowest power setting, gently brush back and forth over the ozone output and the air intake openings to help remove internal and external debris. Do not apply vacuum for more than 10 seconds at a time. Do not blow air into the unit

3. After removing loose debris using vacuum process. Lightly dip a cotton swab in isopropyl alcohol, insert the cotton swab into the ozone outlet opening. Gently rotate the swab while moving the swab in and out until all visible soil is removed. Use a dry swab and repeat above process to remove excess alcohol. Turn unit face down and allow the unit to dry 30 minutes.

Care and Caution

- Do not cover when in use
- Keep away from heat
- Disconnect from power source when not in use
- Always store in a dry place
- Periodically wipe the unit with a damp cloth
- Do not spray with cleaning products or allow mists or other types of moisture to enter the unit
- Cleaning products and moisture will damage the unit (this will void the product warranty)
- Suggested maintenance during use is every 30 days

Specifications
