

Pure “Elite” 50KT

Fruit & Vegetable Washer

Advanced Patented Washing System

Congratulations on your purchase of the O3 Pure “Elite” 50KT Fruit and Vegetable Washer! It is one of the most advanced fruit and vegetable washer on the market. The O3 Pure “Elite” provides consumers with the satisfaction of eating great tasting, safe, healthy fruits and vegetables. We are confident the “Elite” will be one of your most used kitchen appliances.

For years we have been told that fruits and vegetables are good for us as they provide nutrients and vitamins necessary for our bodies. As a society we have washed our fruits and vegetables with the chlorinated water that comes from our faucets believing we are protecting our families from pesticides and foodborne contaminants. Furthermore, research studies have indicated that chlorine is limited in its ability to wash contaminants from fruit and vegetable surfaces.

“Contaminated Fruits & Vegetables”

The number of produce-associated foodborne disease outbreaks and the number of cases of illness due to food pathogens have significantly increased in recent years (Tauxe et al.1997).

Fruits and vegetables are also susceptible to contaminants, capable of causing human diseases while still on the plant, in the orchards, during harvesting, transport, processing, distribution, or even in the home.

O3 Pure Fruit & Vegetable Washer

The advanced patented revolutionary O3 Pure “Elite” 50KT Fruit and Vegetable Washer utilizes the proven technology of O3 (ozone). The superior design assists the O3 bubbles to wash contaminants from fruits, vegetables, sea food, poultry and other meats. Positives benefits include:

- Restores flavour and taste
- Extends food life
- Preserves freshness
- Saves time
- User friendly
- Visually appealing
- Low power consumption

Ozone is natural

Ozone is a naturally occurring trace element in the atmosphere and is produced during lightning storms (high voltage passing through the air). When a molecule of oxygen is bound via oxidation to a third oxygen atom, it becomes ozone. The O3 Pure Fruit & Vegetable Washer utilizes this same principal to produce ozone, but in a safe controlled environment.

“Safety Assurance for Use with Food”

FDA-Ozone Regulatory
Status FDA/CFSAN- June
26, 2001

“The FDA amends the food additive regulations to provide for the safe use of ozone in gaseous and aqueous phase as an anti-microbial agent on food, including meat and poultry.” Final Rule published in Federal Register (21 CFR Part 173, Docket No. OOF-1482)

Before Using

Please take the time to familiarize yourself with the unit, the diagram below will help. A vegetable grate is inside the unit.

General Safety Information

- Do not insert or remove power cord with wet hands
- Do not cover when in use
- Keep away from heat
- Periodically with the unit turned off, wipe with a damp cloth
- Cleaning products and moisture will damage the unit and void the warranty
- Do not let children operate the washer unattended
- Disconnect for power source when not in use
- Always store in a dry place

Directions for Use

1. Place the washer on a flat counter or table; ensure the power cord can reach the power source.
2. Open the lid and place it on the counter or table.
3. Place prepared fruits or vegetables into the bowl (Separate large leaf vegetables and rinse visible dirt from the vegetable before placing into the bowl). Make sure produce is under the fill line. Place grate over products being washed.
4. Fill the washer with cold water up to the fill line shown on the bowl. **Do not over fill the unit.**
5. Replace lid and shift drain lever to close holes.

6. Plug in the washer. Turn unit on by pressing the power button and set timer to desired timed wash cycle by pressing the timer button. Time is adjustable from 1 minute to 15 minutes. The unit will automatically stop when washing cycle is completed.

7. Turn the drain lever to open the holes after washing. Take the bowl together with the lid and drain out the water. Open the lid, remove grate and take out fruits and vegetables. (sea food, fish and meats should be rinsed with fresh water).

8. Unplug the washer, clean the bowl if necessary. Wipe off residual water with a dishcloth or paper towel. Place grate back into the bowl, grate and lid back onto the unit and store in a clean dry place.

Specifications

Model:	Elite 50 KT
Rating Voltage:	110v/60Hz
O3 Density:	50mg/hour
Capacity:	6 L
Power:	10w
Weight:	4.85 lbs. (2.2kg)
Warranty	1 year limited

Warranty

The O3 Pure Elite 50 KT Fruit & Vegetable Washer comes with a one-year limited manufactures warranty from the date of purchase.
